Dear Mr. Keough and Mr. Keeney:

Pratt & Whitney (P&W), 400 Main Street, East Hartford, Connecticut, EPA ID # CTD990672081, is submitting an unmanifested waste report per 40 CFR 265.76. Attached is EPA form 8700-13B. The details of the report are as follows:

On 9/29/93 P&W received four (4) 55-gallon drums of an oil and petroleum solvent mixture from the P&W Andrew Willgoos Turbine Laboratory facility (Willgoos), Pent Road, East Hartford, Connecticut, EPA ID # CTD000845131. Based on previous analysis, this waste was characterized as 'non-hazardous' and therefore was unmanifested. The oil and petroleum solvent mixture was transported in a P&W East Hartford tanker (hazardous waste transporters permit # CT-HW-264) with an accompanying internal certificate of transfer. It is typically stored either in containers as 55-gallon drums or in bulk storage tanks, all for off-site disposal.

Prior to acceptance, the waste was screened on 10/1/93, with a VOA meter, for presence of organics, and the level was higher than the typical acceptance level for non-hazardous waste. A subsequent flash point test yielded results that were under 140°F. It was verified by a certified laboratory on 10/6/93 that the waste was ignitable. The drums have been recharacterized as 'hazardous' at the East Hartford facility.

If you have any questions concerning this report, please contact William Chudzik at (203) 565-0338.

Sincerely,
